The claimed invention is directed to a system for recording onto a storage medium a video segment optimized for trick mode playback. The independent claims identify the feature of "the video processor programmed to selectively form at least one shadow intrapicture from said at least one predictive picture". The closest prior art, Lane et al discloses a conventional recording apparatus for recording trick play data onto a recording medium, either singularly or in combination fails to anticipate or render the above underlined obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
